

StartWallet

www.StartWallet.com

Your StartWallet is essentially an equivalent of a bank account that holds your StartCOINs. It is accessible via your web browser and allows you to store, send and receive StartCOINs.

For mobile devices, we recommend the browser Opera Mini. <http://www.opera.com/mobile>

Creating a Wallet

StartWallet has a simple setup and provides mobile access to your account. Separate wallets are currently required for each device that you intend to use to access your StartCOINs.

1 Go to StartWallet.com.

***We do encourage users to read the disclaimer as StartWallet is currently in beta.**

Disclaimer

The software you are about to use is free, open source, and unsupported beta software. It is important to understand that beta software refers to software that is undergoing testing and has not officially been released, could have bugs, and may not act in a reliable fashion. Because the software is currently in beta, it is possible but not certain that you may lose startcoin or the value of your startcoin. It is recommended that you store only nominal amounts of StartCOINs. You acknowledge that your use of this software is at your own discretion and in compliance with all applicable laws. You are responsible for safekeeping your login IDs, passwords, private key pairs, PINs and any other codes you use to access the software. IF YOU HAVE NOT SEPARATELY STORED A BACKUP OF ANY WALLET ADDRESSES AND PRIVATE KEY PAIRS MAINTAINED IN YOUR ACCOUNT, YOU ACKNOWLEDGE AND AGREE THAT ANY STARTCOINs YOU HAVE ASSOCIATED WITH SUCH WALLET ADDRESSES WILL BECOME INACCESSIBLE IF YOU DO NOT HAVE YOUR ACCOUNT PASSWORD AND/OR PIN. All transaction requests are irreversible. The authors of the software, employees and affiliates of StartJOIN, copyright holders, and StartJOIN Technology Ltd cannot retrieve your private keys or passwords if you lose or forget them and cannot guarantee transaction confirmation as they do not have control over the StartCOIN network. You agree to provide accurate and complete information in connection with your use of the account. You assume any and all risk associated with the use of the software. To the fullest extent permitted by law, this software is provided "as is" and no representations or warranties can be made of any kind, express or implied, including but not limited to the warranties of merchantability, fitness or a particular purpose and noninfringement. In no event shall the authors of the software, employees and affiliates of StartJOIN, copyright holders, or StartJOIN Technology Ltd. be held liable for any claim, damages or other liability, whether in an action of contract, tort, or otherwise, arising from, out of or in connection with the software or the use or other dealings in the software. We reserve the right to modify this disclaimer from time to time.

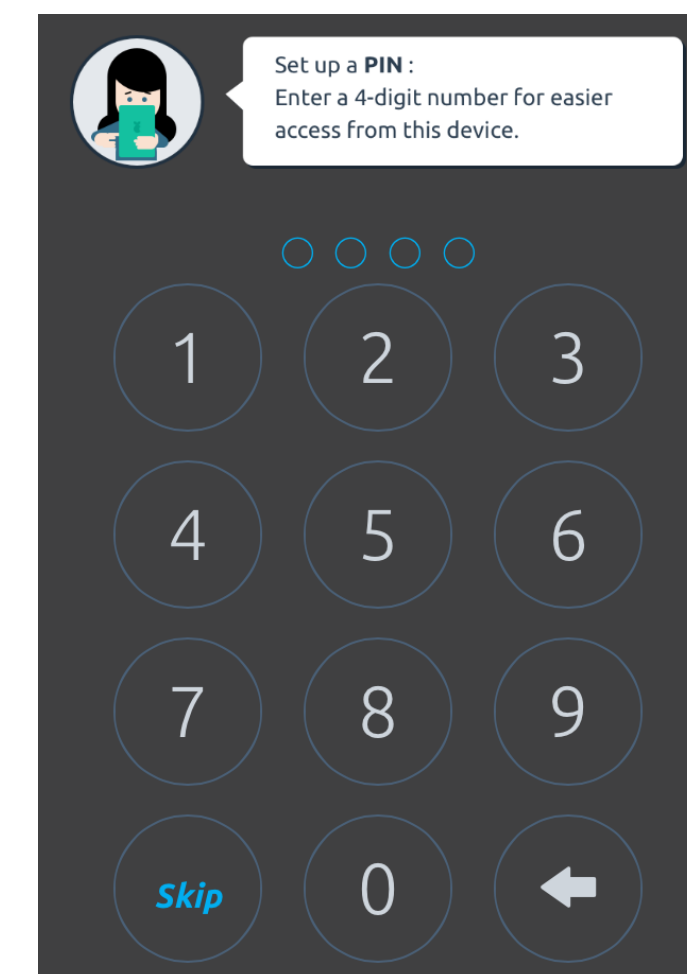

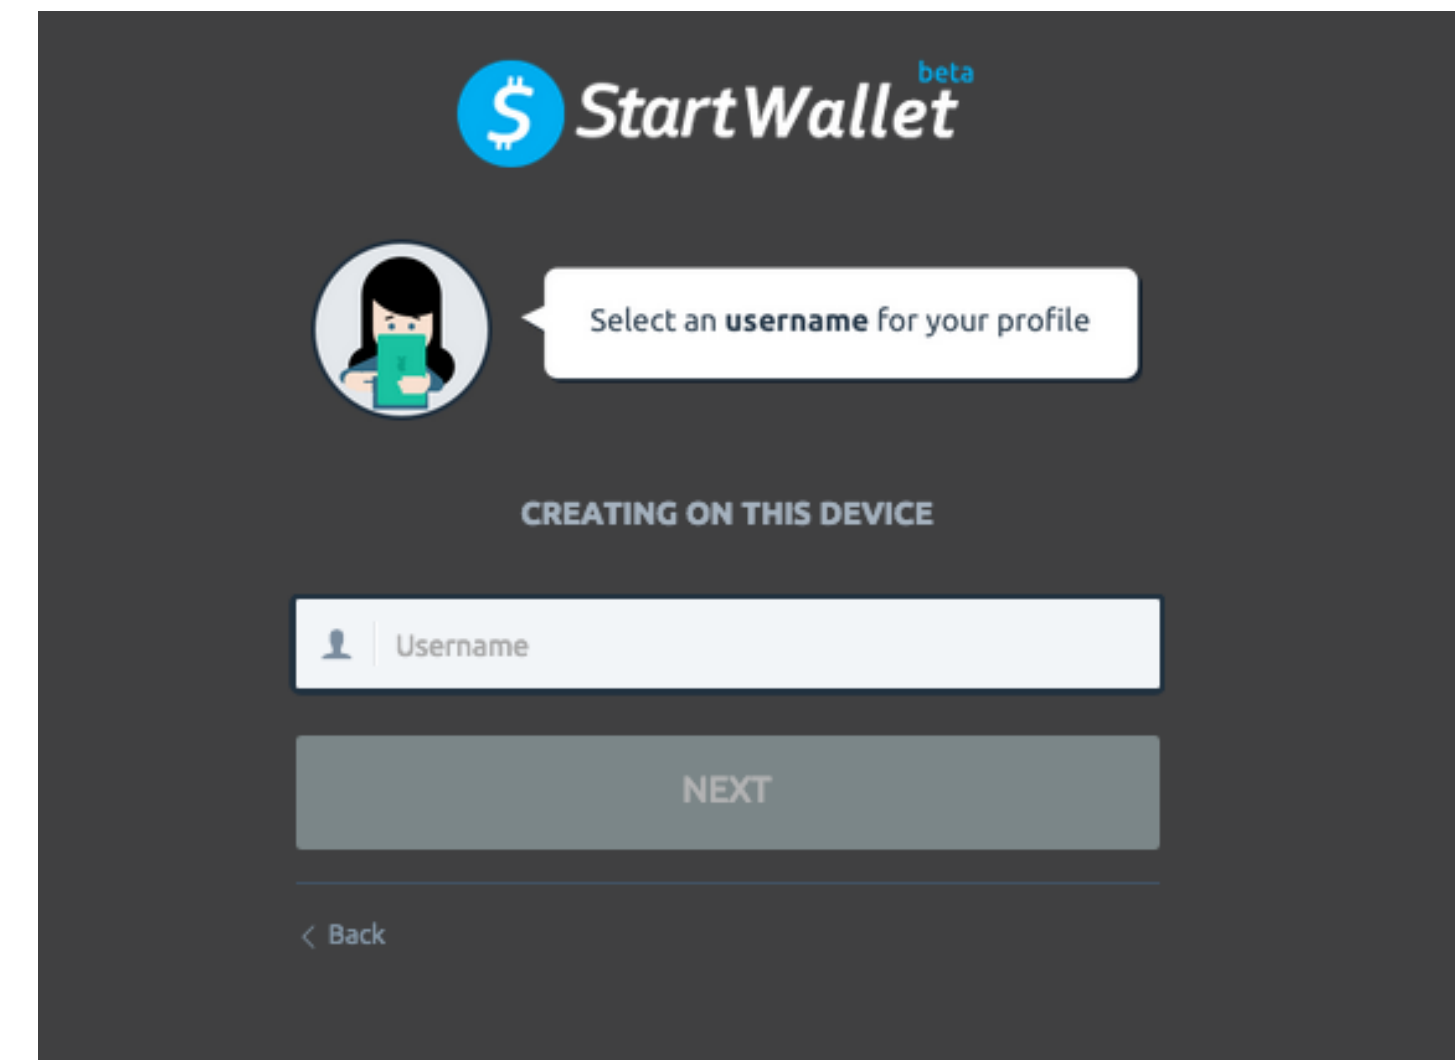

I READ AND AGREE WITH THESE TERMS

Creating a Wallet

2 After agreeing to the T&Cs, create your account with a username and password. Passwords are required to include mixed cases and punctuation.

*****Please ensure your password is kept safely as it is not recoverable by the system and is vital to restoring any back ups.

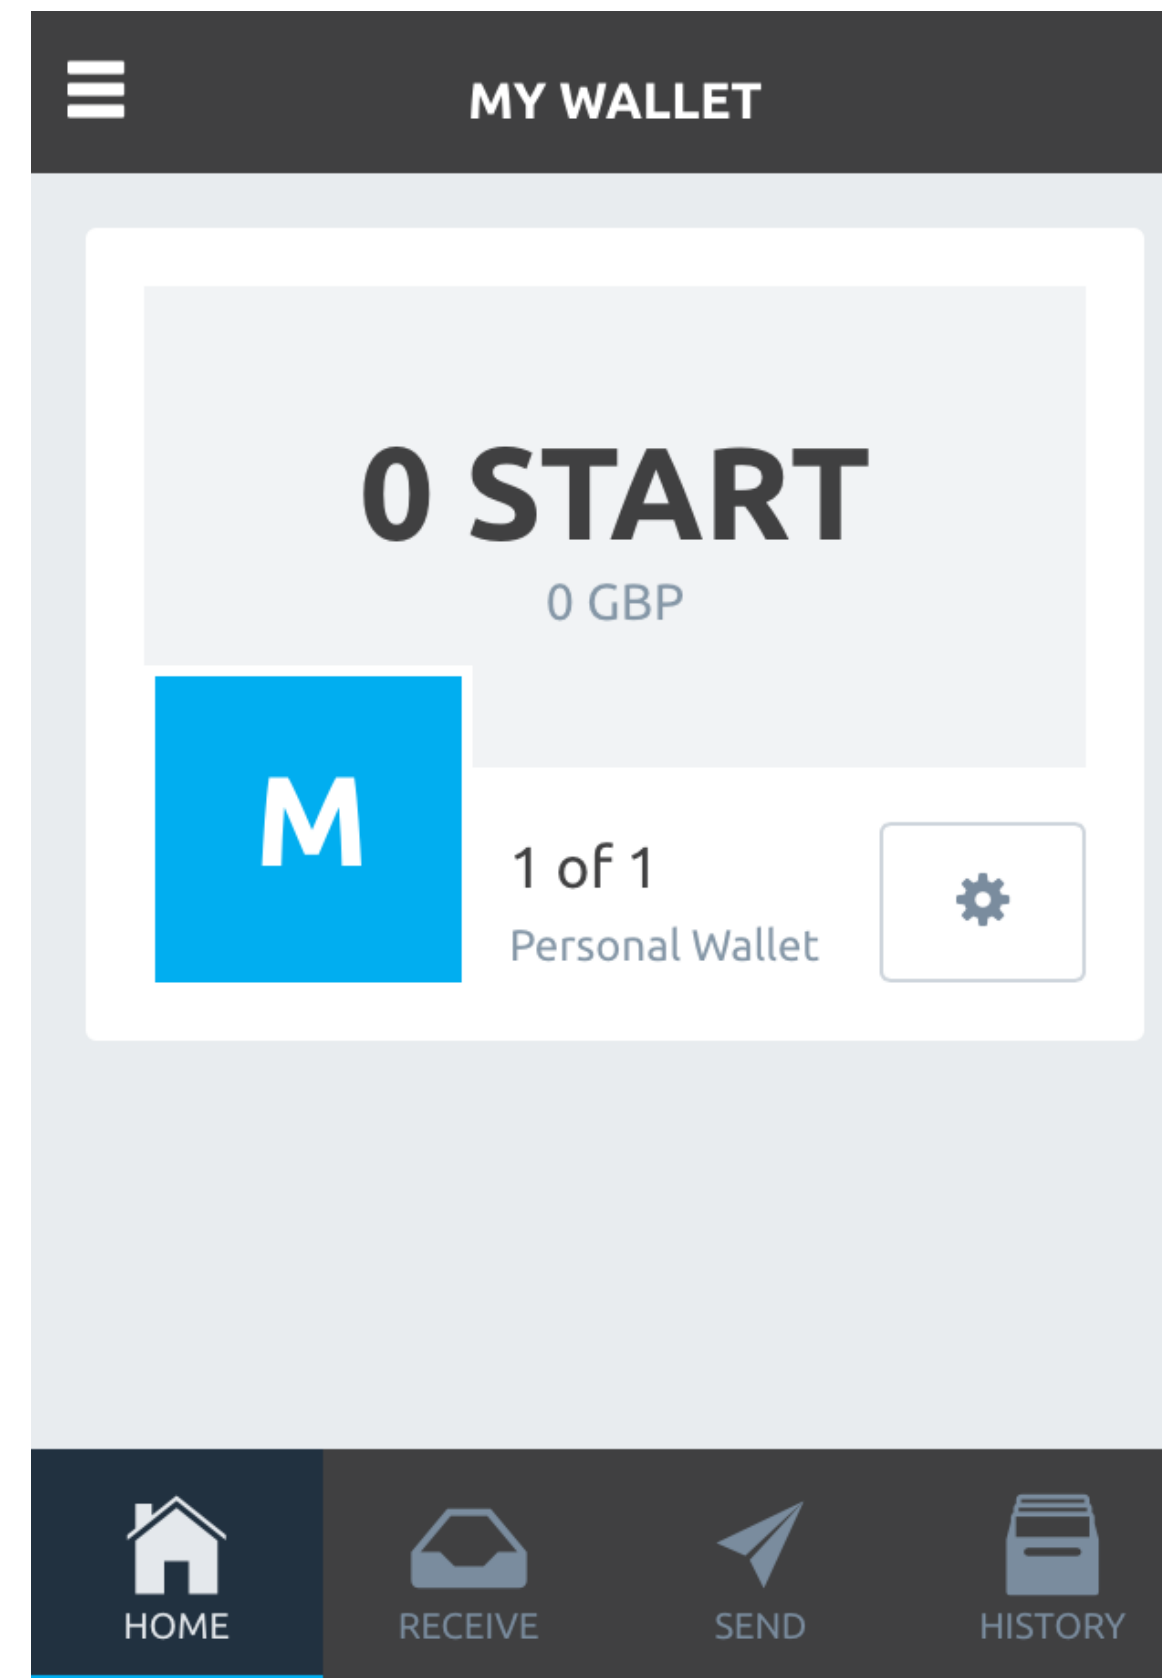

3 On mobile devices, you will be asked to create a 4-digit pin. This is to enable quicker but secured access to your account.

Creating a Wallet

4 You will be logged in after creating an account. View your balance and find the options of send and receive here. Your wallet address is available under the 'Receive' tab.

***Please be aware that you will be asked to re-login after long periods of inactivity.**

Sending StartCOINs from your StartWallet

You can find the Send option in the home page.

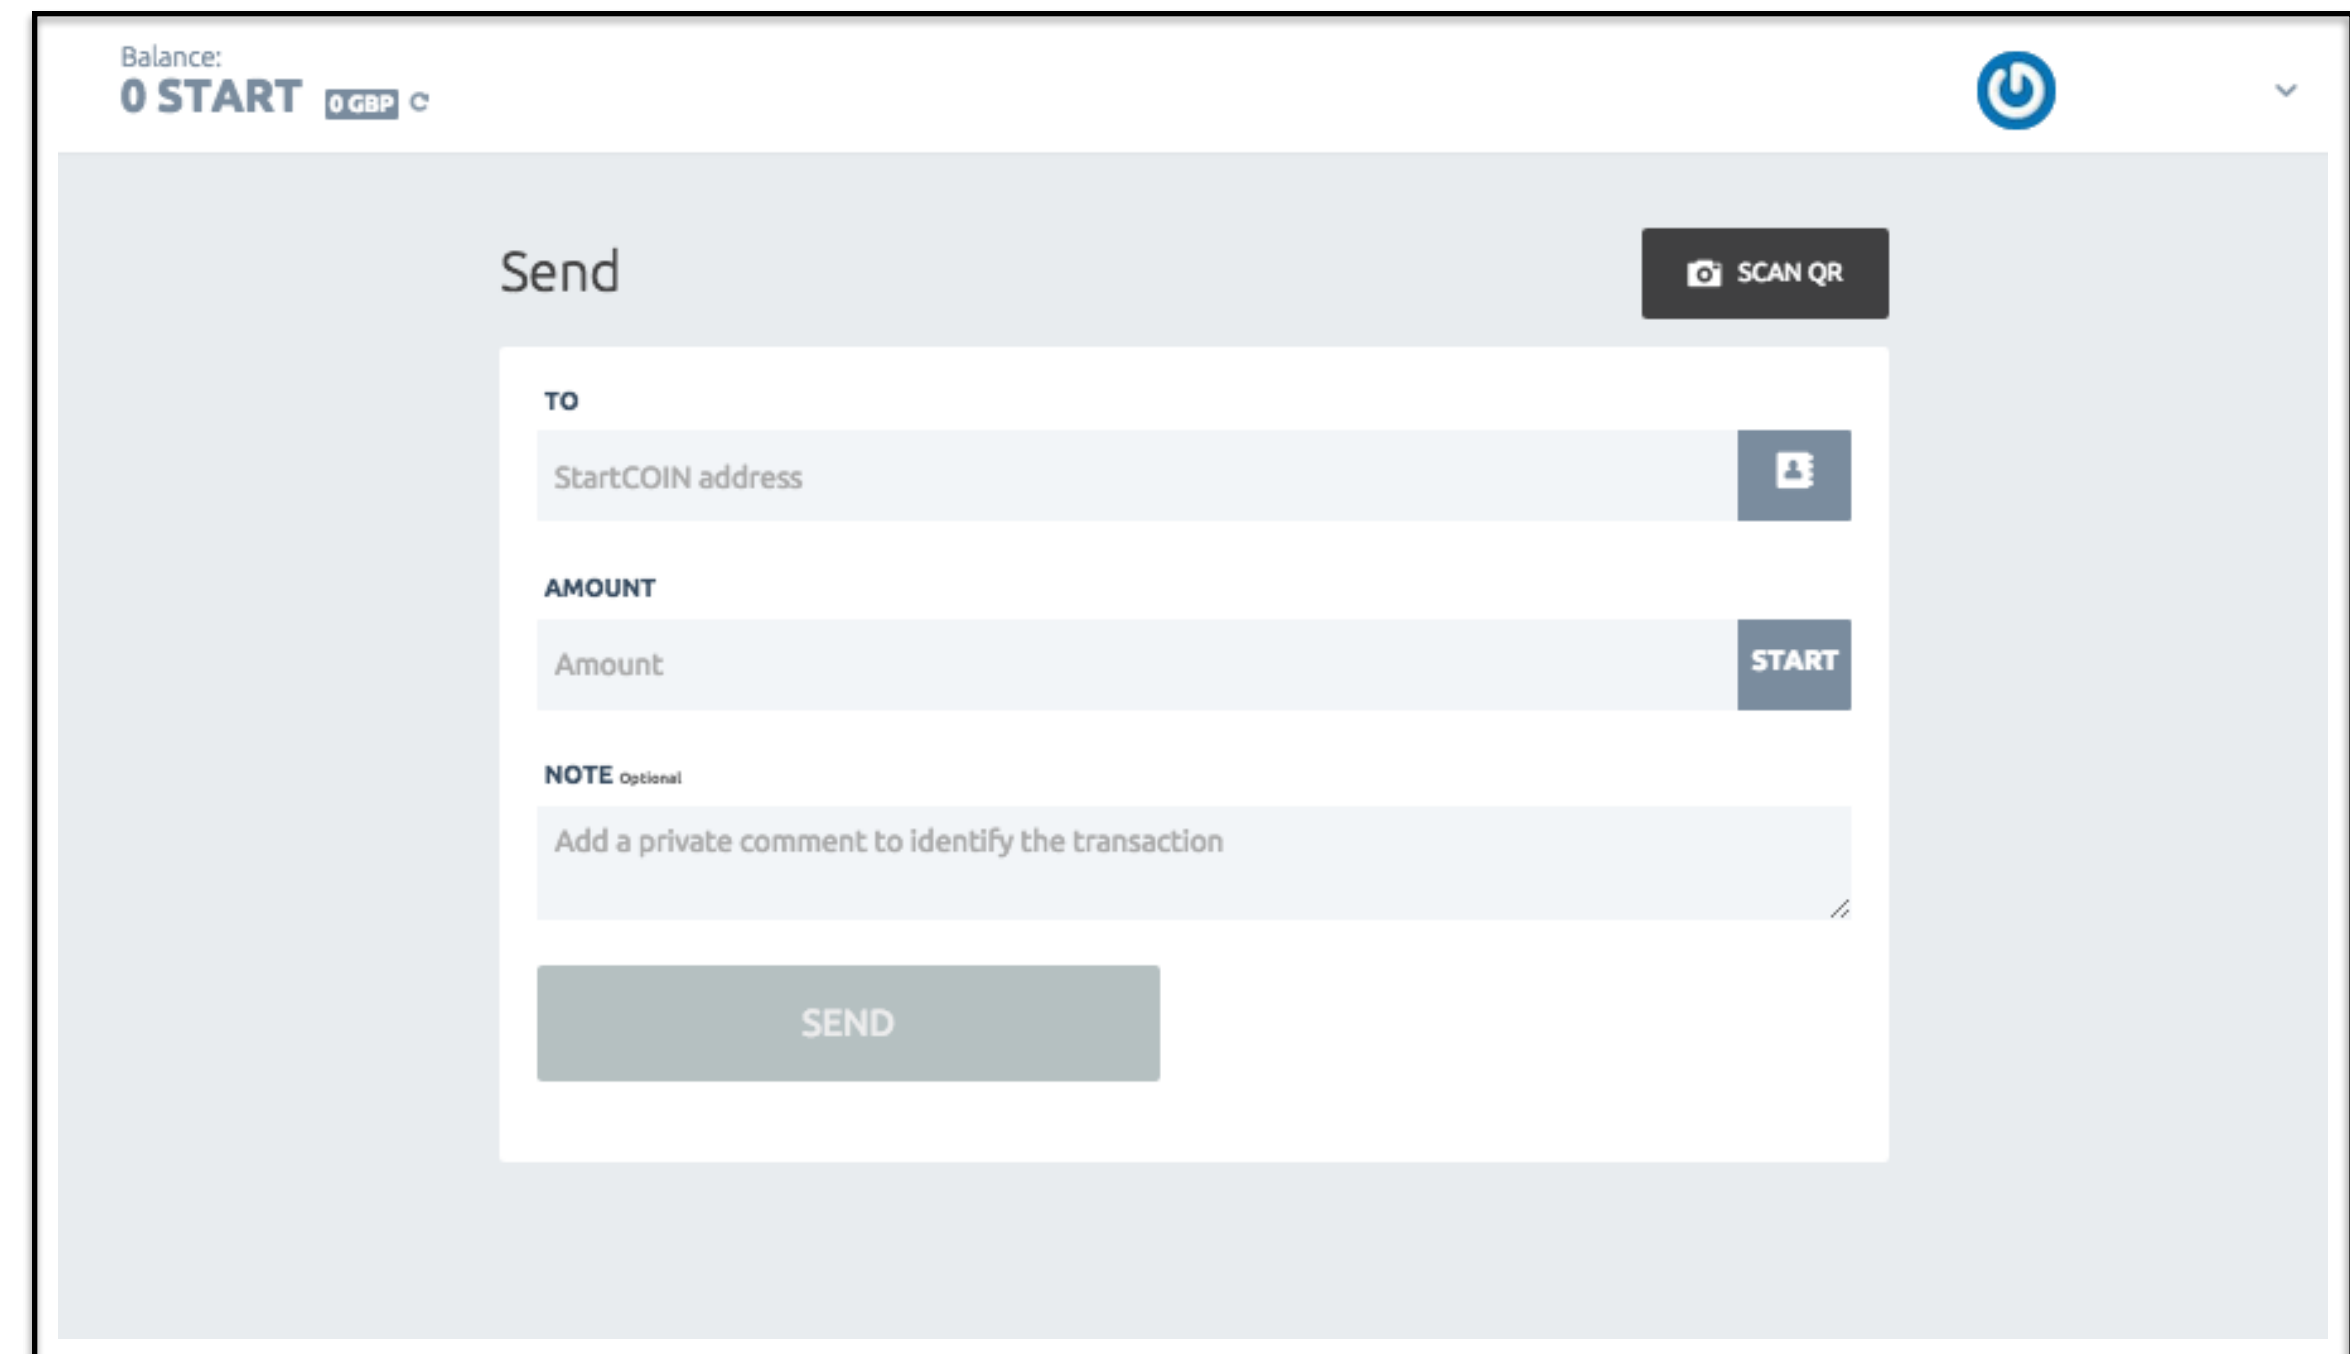

To send StartCOINs out of your StartWallet, you need to ensure an adequate amount of StartCOINs in your balance, and your recipient's address - the payment address.

There are two ways to obtain the payment address:

1 By scanning the QR code of your recipient's payment address.

2 By manually inputting the payment address. We recommend that you do this by copy and pasting from the source to avoid any mistype.

Once you press 'SEND', there will be a pop up confirmation. Your recipient will likely receive a notification of incoming StartCOINs into their account.

The screenshot shows the 'Send' interface of the StartWallet. At the top left, the balance is displayed as '0 START 0 GBP'. A 'SCAN QR' button is located in the top right corner. The main form contains three input fields: 'TO' (StartCOIN address), 'AMOUNT' (Amount), and 'NOTE' (Optional). A 'SEND' button is positioned at the bottom of the form. The interface is clean and modern, with a light gray background and white input fields.

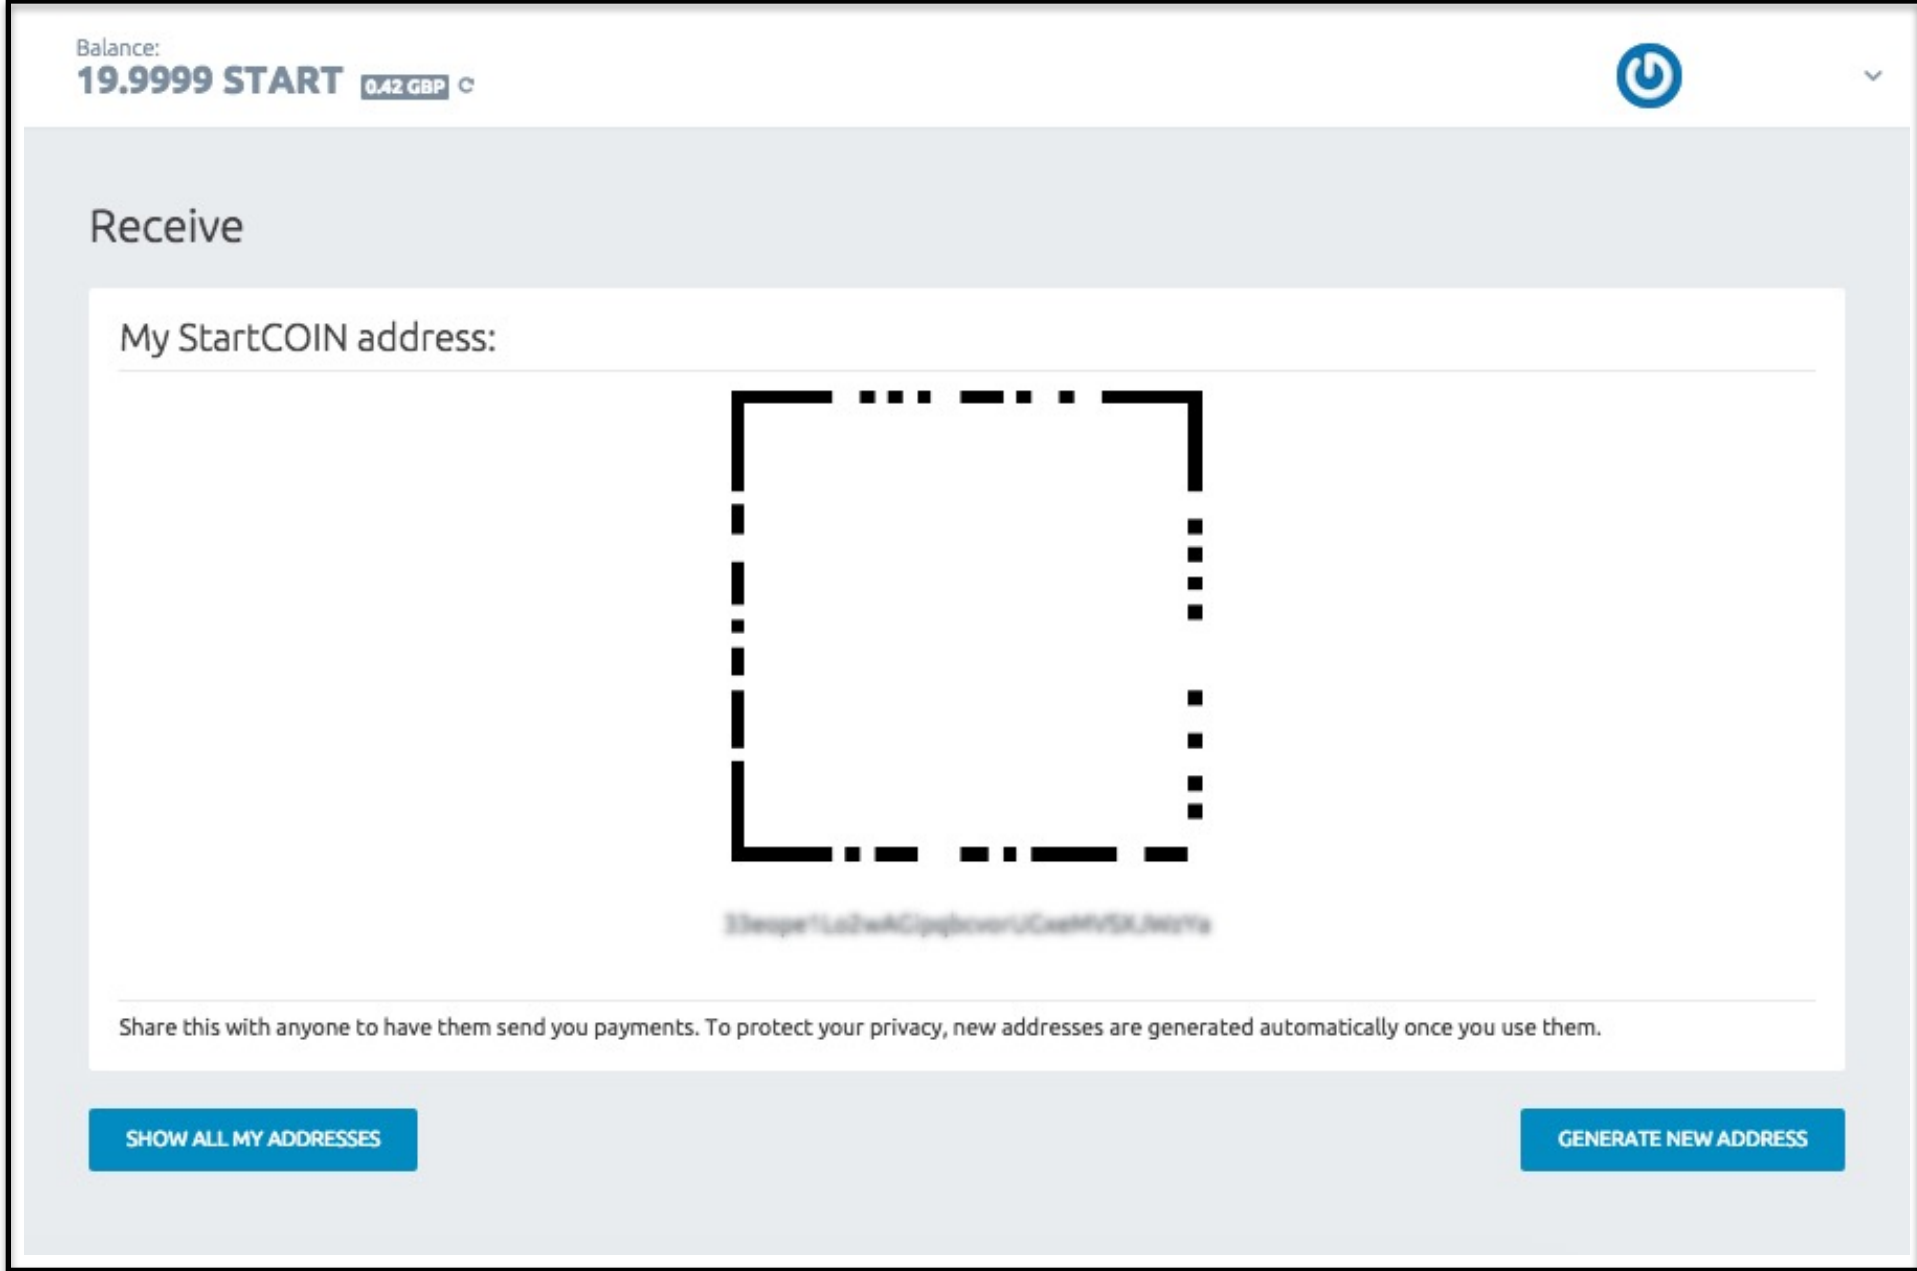

Receiving StartCOINs into your StartWallet

You can find the Receive option in the home page.

To receive StartCOINs, you will need to provide the sender of the StartCOINs with your wallet's address.

It is possible to generate new addresses for each inbound transaction (see bottom right). By doing so, you can identify your various senders by documenting your transactions.

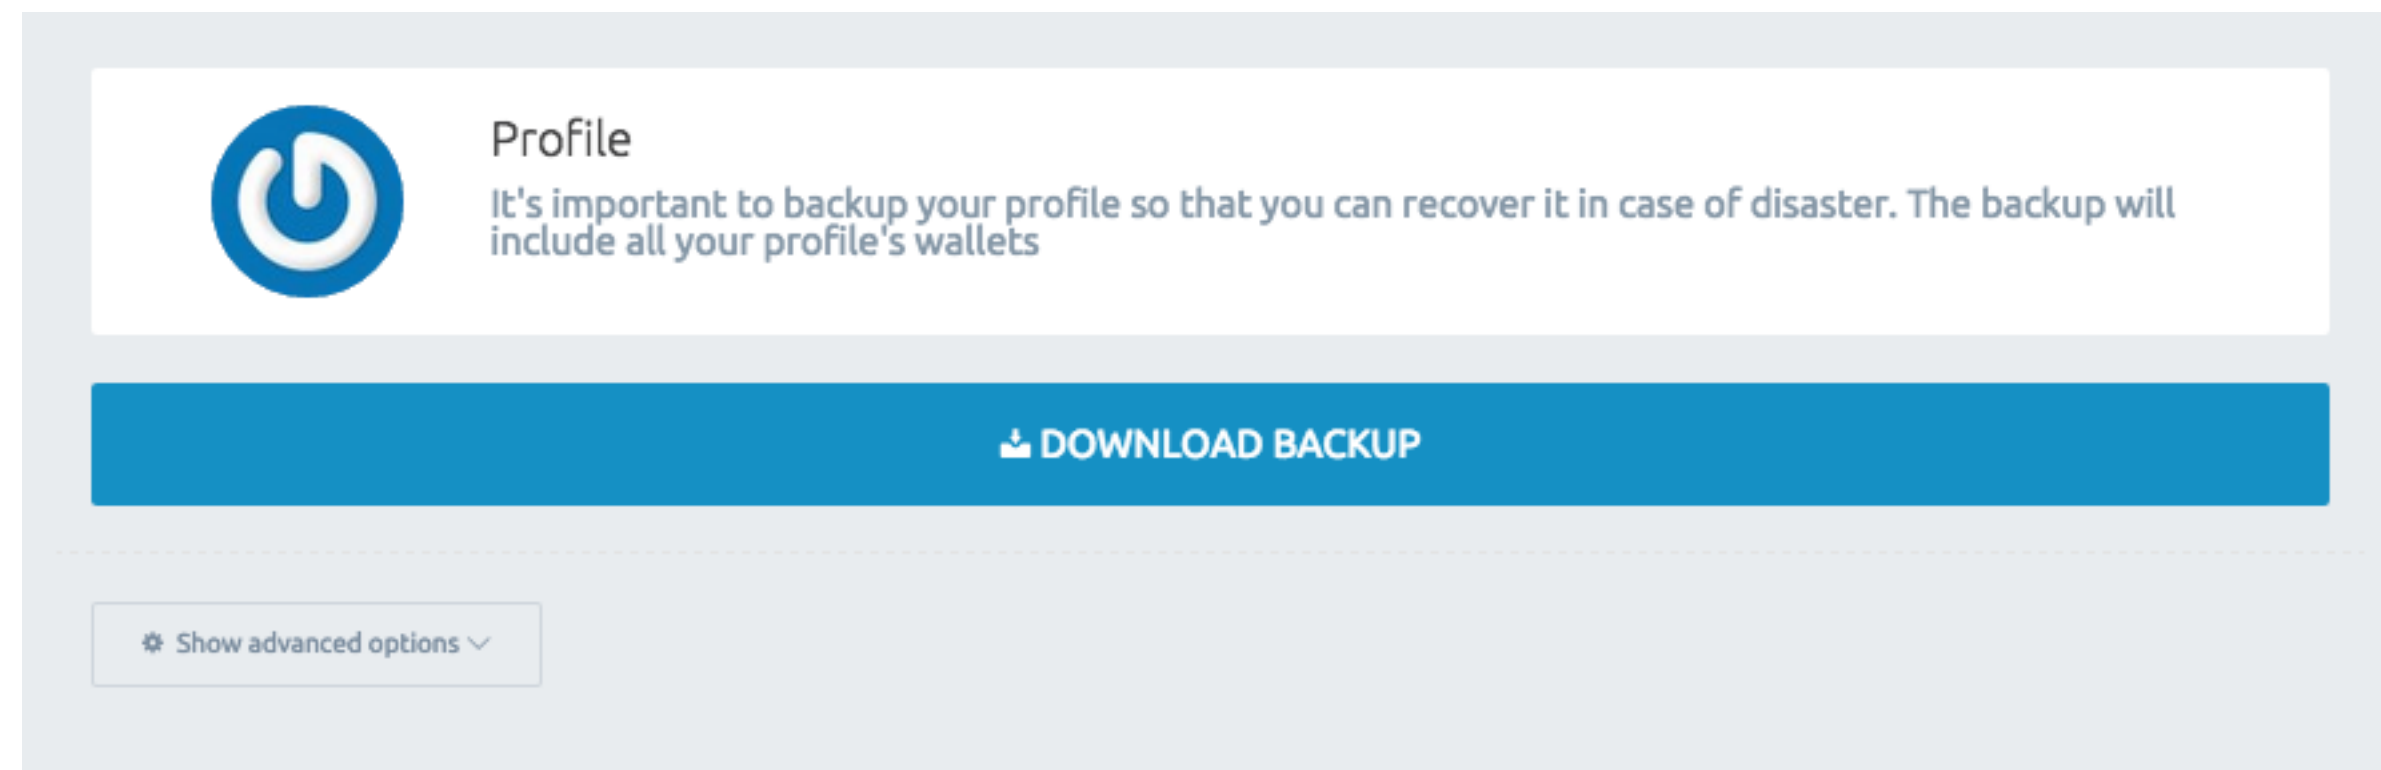

All the addresses historically generated, which identify your wallet can be found under 'Show All My Addresses' - from here you can find the addresses used for every transaction in the past.

Backing Up Your Wallet

It is important to regularly back up your profile to protect your coins. A profile backup includes all the wallets that are part of this account. Also, backup your initial profile setup as all keys derive from it.

1 Under 'My Profile', you will find the option to 'Download Backup'.

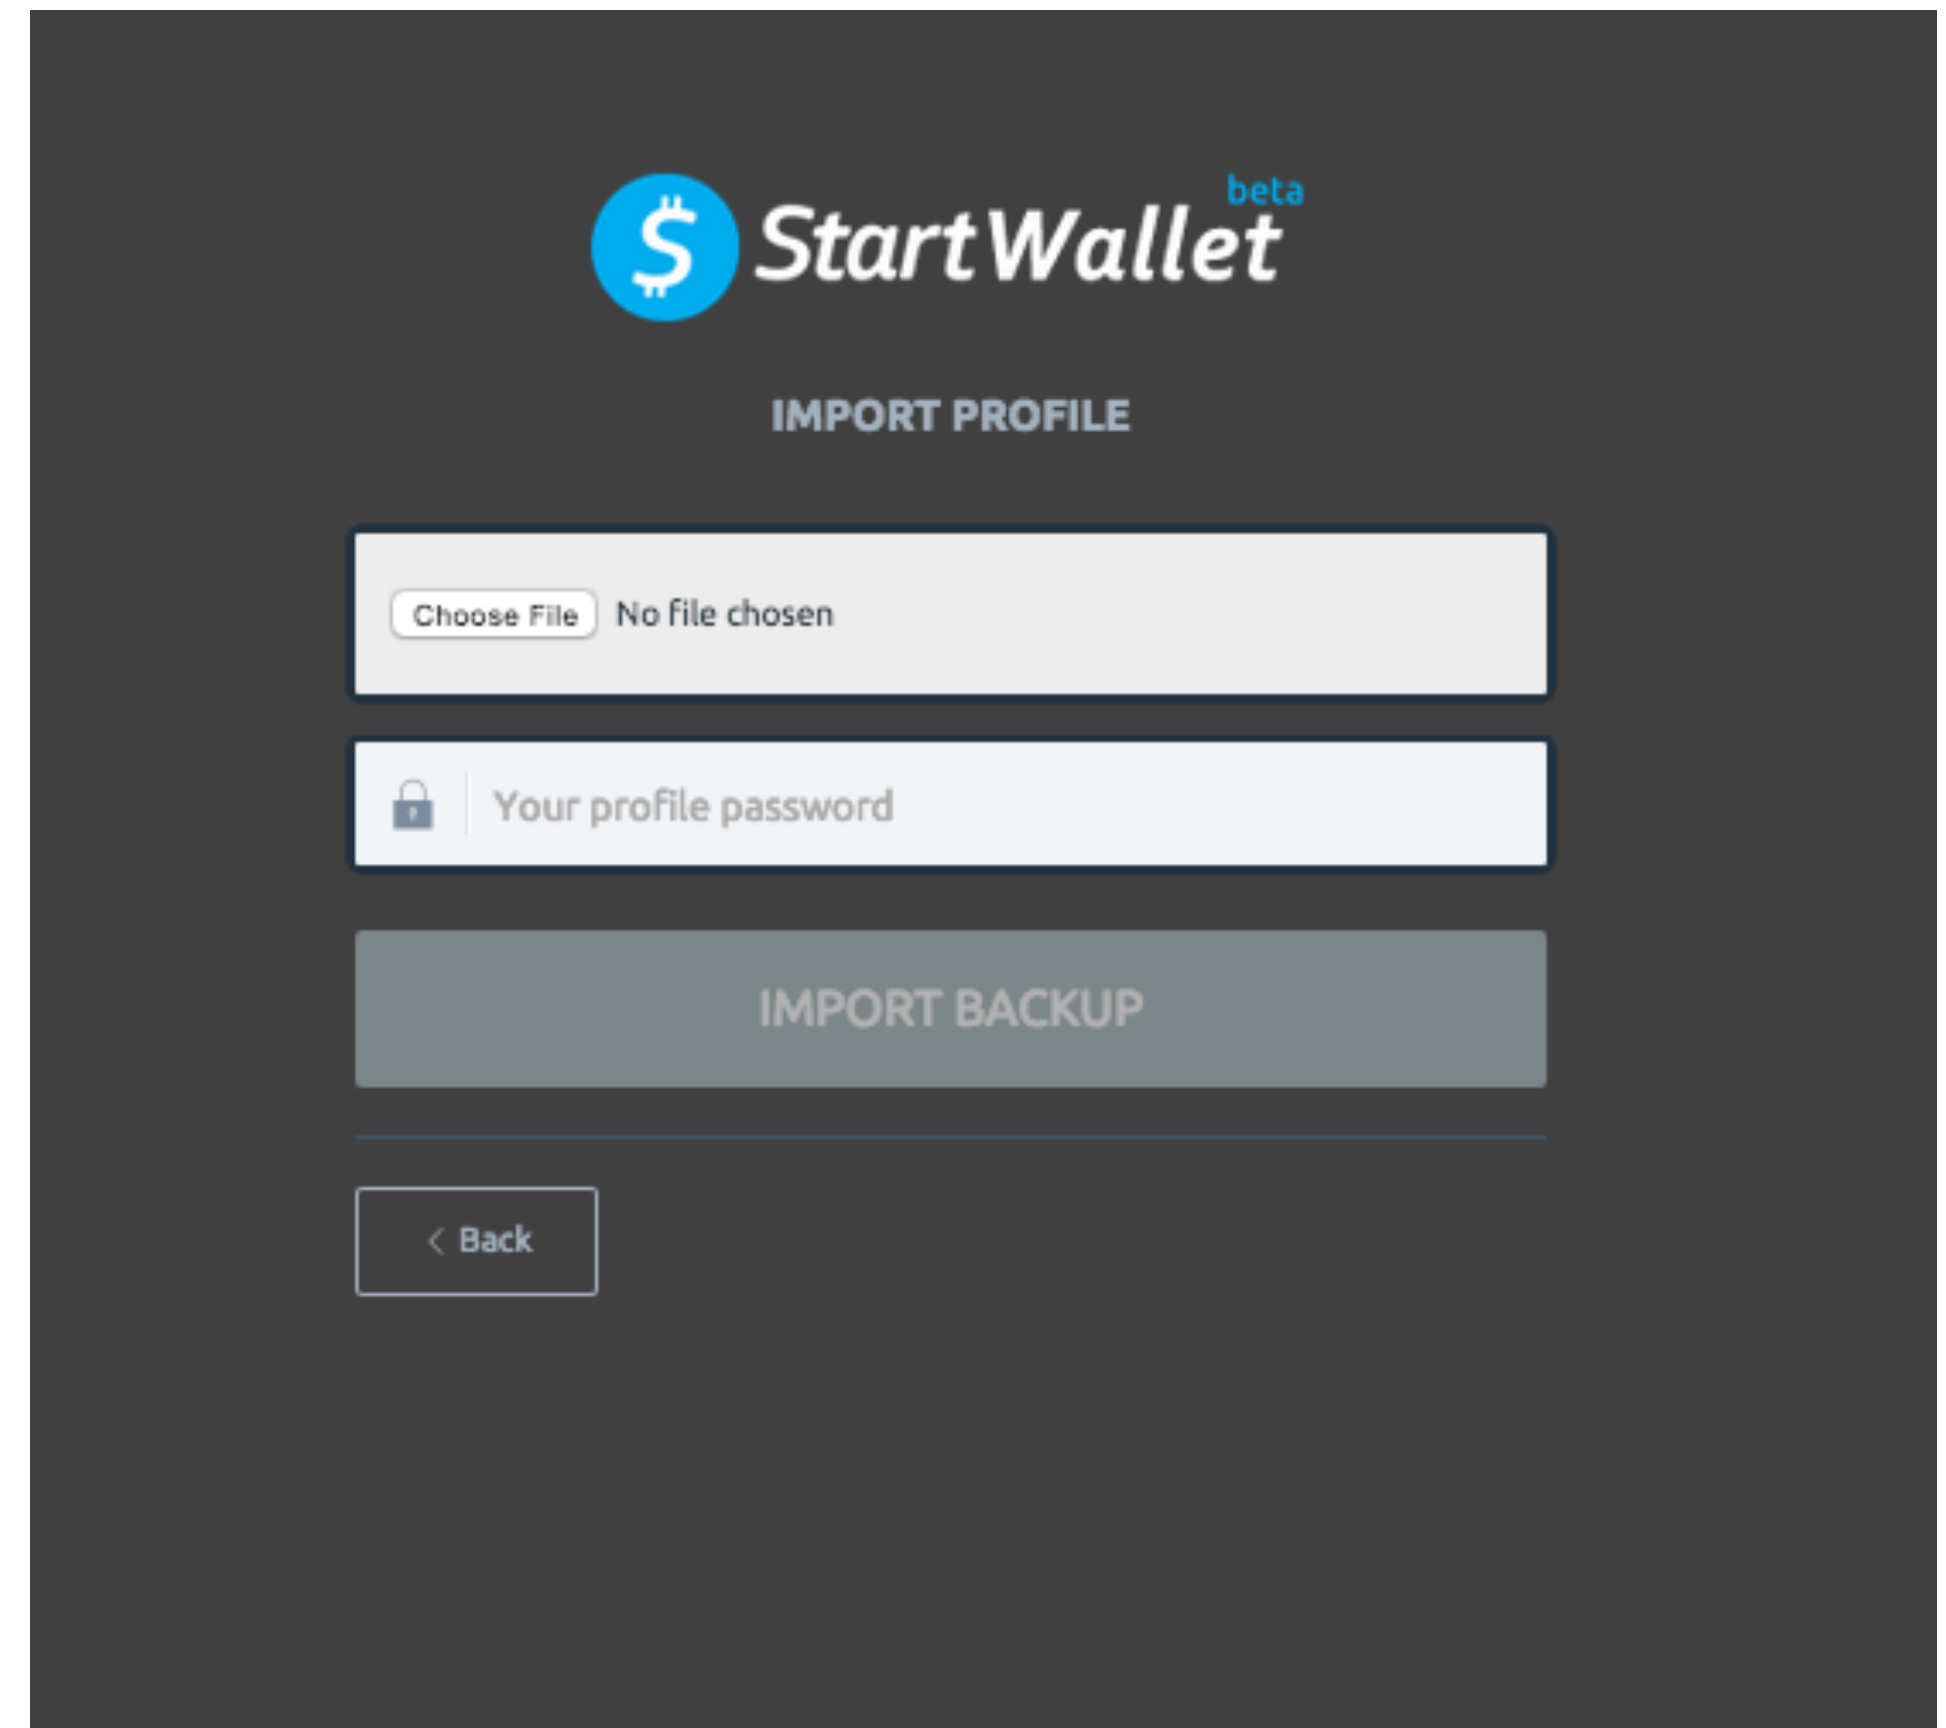

***On mobile devices, you will find the backup in plain text form and you may copy and paste the text to elsewhere for safekeeping.**

***On desktops, it will be downloaded as a text file. Please keep these files in a variety of safe places, we recommend that copies to be saved off the network as well, e.g. on USB drive and external hard drives.**

Backing Up Your Wallet

2 In the event of disaster, your backup file can be imported during the sign in stage, together with the use of your password.

The screenshot shows the 'IMPORT PROFILE' screen of the StartWallet application. At the top, the StartWallet logo is displayed, featuring a blue circle with a white dollar sign and the text 'StartWallet' in white, with 'beta' in smaller blue text to the right. Below the logo, the title 'IMPORT PROFILE' is centered. The main content area consists of three stacked input fields. The first field is a file selection area with a 'Choose File' button and the text 'No file chosen'. The second field is a password input field with a lock icon and the text 'Your profile password'. The third field is a large, dark grey button labeled 'IMPORT BACKUP'. At the bottom left, there is a '< Back' button.
